

Climate Change – Our Warming World
Christina Hutchins

1st November 2009

Hardback * £12.99
ISBN 9781906136314

Climate change is the greatest challenge facing humanity today. In the coming decade a tipping point may be reached triggering irreversible impacts to our planet. The support of the global public is key if change is to be effected in time.

With striking images and moving life stories the book seeks to appeal to a wide audience, to increase understanding and to motivate small but urgent actions that will begin the road to change.

- With an introduction by **Archbishop Desmond Tutu**, a preface by **Dale Vince**, founder of **Ecotricity**, and quotes from **Dr Pachauri**, Chairman of the UN's Intergovernmental Panel on Climate Change, **Sir David Attenborough** and **Susan Sarandon**, *Climate Change* is an engaging photographic summary presenting the cause, impacts and solutions to global warming
- It is published to coincide with COP15, the Copenhagen Climate Change conference – a key landmark in the history of Climate Change policy
- Includes testimonials, written by people already experiencing the impacts of climate change, that bring the facts to life - from a Bangladesh flood victim to an expert on the threats faced by polar bears in the Arctic
- Includes a call to action to switch to a green electricity tariff and a petition outlining a global climate change emergency plan, a blueprint for readers to send to their MPs and MEPs
- The author Christina Hutchins is the founder of **Our World Foundation**, a not-for-profit organization established to raise awareness about climate change and stimulate support for the solutions.
- *Climate Change* is the latest in Alastair Sawday's Fragile Earth series. It is sponsored by *Ecotricity*, the world's first green electricity company.

Quotes

“Today humankind faces a challenge on an unprecedented scale – within the coming years we have the choice either to watch our planet be irrevocably altered or to come together internationally and strive for change... I ask those that read this book to do all they can to bring about change.”

Archbishop Desmond Tutu, April 2009. Extract from the introduction to Climate Change

“These photographs tell a powerful story...they are begging us to take heed. How to take heed? There are many ways, but you might start by switching to renewable energy. It is so easy, and so effective. If we all demand change then it might happen. Let the energy revolution start right here...”

Alastair Sawday, publisher of the Fragile Earth series & Chairperson of the Bristol Green Capital Momentum Group

“The choices we make are having this profound impact. We can't see it so clearly in our lives, but we can see it, through this book, in the lives of others. This book is about the consequences of not acting; it's about a harsh reality that our choices are forcing on other people. The imperative to act is clear. “

Dale Vince, founder of Ecotricity

About Ecotricity

Ecotricity is an electricity company with a difference, dedicated to changing the way electricity is made. They invest the money that customers spend on electricity in clean forms of power like wind energy and are the only green electricity company actually building these new renewable energy sources. By the end of 2008 they had invested over £50 million in wind energy with many more projects in the pipeline.

About Alastair Sawday Publishing

In 2008 and 2009 Alastair Sawday Publishing was awarded the Environmental Award in The IPG Independent Publishing Awards. The company was also awarded a Queen's Award for Enterprise (2006) in the Sustainable Development category and a Business Commitment to the Environment Award (2005). Their *Fragile Earth* imprint publishes campaigning books about the environment.
